Mines and Prospects--Furnaces and Mills

ORES THAT TALK FROM TUSCARORA

An Object Lesson in a Setting of Silver and Gold From the Old Nevada Camp.

that wees of extraordinary wealth entinue at Tuscarwa. Nev., notwithstanding the despondency of those who went down with the Dexter and its multifarious mills and processes, was reasserted yesterday, at which time there was sold on the open market a small lot of ore on controls showing as much as \$432 gold with 537 ounces sliver per ton. The consignment, a small one, came from territory owned, it is said, by E. H. Airis of this citya nd operated under a lease by miners of the camp. The ore is similar to that which has come at long intervals in recent years from the old camp and is confined to streaks with occasional cells, the contents of which are such as to compensate the night for a month's excellent

sate the miner for a mouth's exertion. It is gaid of Tuscarora that with the veawakening at Mountain City, into which latter Samuel Newhouse, D. H. Peery and others have gone, it is show-ing some signs of increased activity and that several old propositions are and that several old propositions are being inquired into by new blood. Not many of the old-timers are prepared to believe that its wealth has been ex-hausted notwithstanding the bitter ex-perionce of Salt Lakers who have planted their moneys in Dexter and Young America. On the contrary there is a conviction that at great depth, which may be reached with powerful pumps, considerable wealth continues to exist.

IN SIX MONTHS.

Salt Lake Valley Furnaces Recover \$700,000 From Goldfield's Rock.

The best evidence of Goldfield's merits as a camp of gold, said Vivian Strange yesterday, is that during the past six months it has produced, from the grass-roots, practically, gold-bearing eres for which the consignors have ing ores for which the consignors have received no less than \$700,000, without reference to the milling classes that have been either piled upon the dump or left standing in the mine pending equipment with which to reduce them. When a person is permitted to see a check in the sum of \$65,000 in payment for eighty tons of ore; another of \$56,000 in payment for seventy-five tons, and another of \$39,900 in payment for a single carload, he must be convinced of the presence of a class of wenith on which great camps are founded, added Mr Strange. Of the Great Bend group, on which he has just acquired an option and in which he expects to interest tion and in which he expects to interest local talent. Mr. Strange says he has been sparring for it for three months, or ever since he, with Rob Walker and others, pitched his tent in those dig-gin's. Of the merits of the property he has no doubt whatever and to further demonstrate them he will inaugurate systematic work the last of the present

week

While a great many are catering to
the needs of the camp at this time,
there is room for more, said Mr.
Strange, room especially for a class
that is prepared to improve upon that
already present and that is capable of
going the pioneer one or two better. He
expects to see a very populous camp in
the locality as wages are above the
average with everything corresponding average with everything corresponding with them. For his day's labor the miner is paid 34, while the carpenter receives from \$5.50 to \$7 with but a limited number to be had at those figures. That a greater number of buildings ar not under active construction at pres ent is that material with which to build them cannot be obtained. The orders for lumber, indeed, are three months shead of the suppty.

HONERINE AND OTHERS.

President Snyder and Staff Spend a Day Behind Closed Doors.

The day at the offices of the Western Exploration company found Manager Willard F. Snyder, who had returned from the East, closeted with the various from the East, closeted with the various members of his cabinet and when night came he was conversant with all that had been achieved during his absence. The splendld reports with which Super-intendent Raddatz had arrived from the Honerine compensated the manager for all he has missed while he as a member of the committee, was informing President Roosevelt of his nomination at the hands of a peerless party. The log the hands of a peerless party. The log from that property and the plant at which such excellent work is being done. reveals a steady increase in the output of a producer that is gradually asserting its title to first place among the lead producers of Utah, while at the Buck-horn in Ophir canyon the management has the campaign well in hand. With conditions throughout President Snyder is very much pleased.

CLOSES A CONTRACT

South Swansea's Output to Go to Furnaces of U. S. Smelter.

Under a contract which the manage ment characterizes as a most faverable one, the South Swansen of Silver City. finite, will begin at once the delivery of its output to the furnaces of the United States Mining company. Under its terms the company sees how the margin on its ores can be materially increased and while it is not discussing dividends, it now feels that it is justified in returning to exploratory work in an endeavor to prove up new resources on the west. That new bodies of ore await it along that meridian the management has long believed, and with increased earnings it feels justified in going after them. The Paxman lease, which has been with guite satisfactory results, and during the life of which the company has been permitted to pass round a piece of bread-money, however unpretentious was renewed vesterday and by him it is expected the sub-lenses will be continued. Tintic, will begin at once the delivery

New Sun Typewriter, \$40. Carbons, riobons for all machines. Pembroke sells them,

DAY ON 'CHANGE.

Daly West Makes an Effort to Recover Lost Prestige

The week on the mining exchange stock for \$4555,63, the improved tone of the market reflected, perhaps, in the light transfers. Daly West made another effort to recover the leadership of the mar-ket, and in doing so sprinted to \$12.87%. with the buyer who towed it in on Saturday marking up a gate of \$1,07% per share, while Daly-Judge maintained Reposition around \$4.50. Con, Mercur, with 960,000, was shorted down to Mily, while spot deliveries were bringing 3%, while spot deliveries were bringing 32%, while Sacramento, its neighbor, changed hands around 11 cents. New York straightened up and sold at 5%, with that figure held out to it at the close, while Tetro, on whose August dividend the transfer books will close Thursday, was marked down to 29%, with \$3 the best to be had for Grand Central and \$1.70 asked for Mammoth, the day cleshig on the following market:

Plenty of Bidders for the Contents of

California's Treasury. With no fewer than three bona fide blds for the shares contained in the treasury of the California Mining company, the officials of that Park City proposition are in a most cheerful frame of mind these days, and to consider them a meeting of directors is scheduled the present week. It is said of the bids by an officer of the company that any one of them will enable the company to discharge the balance of its indebtedness, leaving a balance with which to prosecutes further development. Meanwhile work at the mine continues, with results more encouraging than at any period in several years, and that an order to start the mill will issue in a short time is not at all unlikely. With which to supply it, indeed, there is a large amount of ore at this time,

RAILWAY TARIFFS AND THE DIGGIN'S

A Few Words on the Policy of the Roads Toward the Camps by Traffic Manager Eccles.

His face a classic in tan, Silas W. Eccles, general traffic manager for the American Smelting and Refining company, came down from his ranch at Island Park, Ida., yesterday morning, and a half hour later was, with Harry Tooker, his secretary, wandering in fancy through every mining camp embraced in his jurisdiction. Reference to the record disclosed that from these diggings, with his company's various furnaces as its destination, no jess than \$50 carloads of ore is moving daily, while some of the camps are hollering for more steam and more cars. And, to meet the requirements of an in-creased tonnage, said Traffic Manager Eccles, the railroads are doing at at their power. Indeed to no other agency, unless it be the big company of which he is the representative, is the producer indebted to greater extent for condi-tions that have made an unprecedented output possible, and while tariffs have been readjusted generally, there are localities that shall, no doubt, receive further attention before the close of the year. To the credit of the Southern Pacific, over whose rails the wealth of Ne vada discoveries is finding its way to the furnaces, it may be said, added Mr. Eccies, that Sait Lake valley has been placed on an equality with other smelting centers. As a rule, said he, the rallroads have always responded to the needs of the producer in the transportation of his ores. A recent concession from that source is the new tariff on bullion, from which vast benefits are being derived, and while locally the Tintle producer has not obtained all to which he believes himself entitled efforts in his behalf are by no means suspended. The latter has said that if the maximum, under the \$1.50 tariff out of its camps, is extended to include \$20 ore he is ready to benefit the rail-road and the smelter as well as himself, and while no action has been taken it has by no means been dismissed, said

On Thursday he will leave for Denver, and after a few days there will continu companied by Harry Tooker.

SWANSEA OF TINTIC

Vague Rumors Concerning Its Sale Floating Around.

That negotiations for the purchase of the Swansea mine at Tintic are in pro gress, is a rumor that will not down, notwithstanding denials from sources that ought to be in possession of the facts. In the lobbles of the mining ex-change and upon the "street" yesterday it was again affirmed with some emphases that when operations are resumed next mouth it will be under the direction of a crowd which has under taken to purchase it. This is, of course denied. So is the report that the management has effected a contract with the smelter that shall enable it to start to market again with its low-grade ores. The denial of the latter is less ores. The demai of the latter is less emphatic, however, and there are not a few to urne that if a contract has not been made it soon will be. On the street it is said that whatever the result of negotiations for the purchase of the properties, the properties will be mined to greater depths, the theory being that underlying present levels are ores which copper shall predominate, as the properties in the limestones, theory—a pleasant one—has been ex-ploited for a long time, and that the company has not undertaken to fathom it before this is, perhaps, that it im-plied the handling of water. That a hange awalts it with depth, however is quite generally conceded, and a veri-fication of it would do more than anything to restore life to the poryhyrie

REFUSED A MILLION.

Thomas Lynch of Salt Lake Turns Down Offer for an Interest.

The immense wealth of Topopah and Goldfield may yet be equaled, if not exceited in value, by the sliver-lead deposits now being opened up by the Southwestern Nevada Mining company, owning the Last Chance mine at Reveille, and of which Thomas J. Lynch of Salt Lake is the possessor of one of the principal interests, says the Bonanza of Tonopah. Nev. The great cave in the limestone, reference to which has been previously made in the Bonanza, has now been more extensively explored and found to average fully thirty feet in width. 200 feet in length and over forty feet deep, and a careful estimate flares the ore contents at 25,600 tons of an average value of \$100 per ton. Much of this ore is almost pure white lead and the smelters will pay a premium for it. This remarkable cave was discovered at a depth of about forty feet from the surface, and a tunnel now being driven to onter it on its floor is expected to do so my day. In addition to this, the company has proved on the property a vein of lead carbonate ore twenty-five feet wide, of an average value of \$75 per ton. Bids are now being called for hauding 10,000 tons of the two propers and the contracts for this will probably be doubled. The company is a private corporation. C. E. Morris, Malcolm L. Macdonald and Tom Tynch being the principal stockholders, and it is stated that an offer of \$1,000,000 was made this week for Lynch's interest. Soldfield may yet be equaled, if not exeffed in value, by the affver-lead deposits

THREE MILLIONS AT THE SURFACE

Management of the Senior Tonopah Discusses the Ores Now Awaiting Shipment to Utah.

To adequately equip and to get the

stupendous wealth of Tonopah ores now at the surface in motion, the management of the new line of rallway between camp and its connection with the C. & C., is pounding the manufacturer of railway equipment to the limit, said Manager Frank Keith of the great Tonopah mine, yesterday. The miner, indeed, is no more eager than is the crowd by which the outlet was constructed, to see this, and each should see his ambition gratified within the next sixty days. While the mine ownrs at camp are confining the cam paign underground to exploratory work at this time, it is estimated by Mr. Keith that awaiting shipment on the jumps and at the foading stations is no less than 50,000 tons of ore, of a value approximating \$3,000,000. Of this the Tonopah company alone has 40,000 tons, said he, the remainder divided among the neighbors. With exceptions these ores at the surface are what is characterized at camp as second-class, the average ruling at \$60, perhaps, although \$200 or \$300 or \$500 rock may be found on any of the dumps. In addition to the consignors at Tonopah are those of less prominent camps, by which it is surrounded. Conspicuous among these surrounded. Conspicuous among these is the property operated by Thomas J. Lynch at Reveille. Of this Mr. Keith says it will no doubt add another to fortunes already achieved by the young miner from Utah, who took hold of the Tonopah mine originally and made it consists to describe the markets. possible to demonstrate its merits.

Of recent acquisitions at Goldfield Mr. Keith says that with Steve Baldwin of this city he is exercising an op-tion on the Venus, while with Nevada associates he is operating a lease on the Mohawk, from which group some fine re is now coming.

Mr. Keith, whose visit here is being

made pleasant by many old friends, will leave for camp again tomorrow, after a pleasant conference with W. G. Lamb, the company's Suit Lake representative

ROAD TO GOLDFIELD.

Camp Must Show Its Wealth at Depth Before an Extension.

According to Alonzo Tripp, general nanager of the Tonopah railroad, Goldfield must make a still better showing be fore the Tonopan road will be extended there. "Tonopah has demonstrated beyond doubt," he said, "that she has immense ore bodies [ying at great depth, and Goldheid must do the same. When she does we will lose no time in extending our road there. We are making a survey now, and we find that the intervening country is admirably suited to road building. The grades are not heavy and there will not have to be much cutting and no runneling."

When asked to what depth Goldfield would have to go to satisfy the railroad that she had a lasting supply of ore. Mr. Tripp replied that if at a depth of 500 feet there still remained large bodies of ore the extension would be made. At present, he says, the Combination is down over 250 feet, and the indications are good for the velos holding out to much greater depths. there. "Tonepah has demonstrated be-

GONE INTO IDAHO.

Sacramento Officials Visiting Interests in the North Again.

Mercur quite up to requirements, Glen R Bothwell, its manager, and Bobert Mcconnaughy. Its treasurer, have gone to the commandly, its treasurer, have gone to the American Falls Land and Power company's plant at Blackfoot, Ida., where they will remain several days, the latter to centinue to Chicago, tha Ogden. While the August dividend from the Sacramento has not been efficially discussed, the impression prevails on the street that it will be passed until the next sale of quickslever, of which there is about 150 flasks now stacked up at the property. OPTION ON MASCOT GROUP.

Claims on Virgin River Yield Ores Showing Excellent Prospects.

CALIENTE: Nev., Aug. 22 -Charles fuller and Will Jones passed through amp today, on route to their claims on the upper Virgin river. They were accompanied by George F. Bulmer of Denver, who will examine their Mascot group and, if satisfactory, will take an option on the fourteen claims comprising the group. They show assays taken in Sait Lake and Denver for the ore extracted from these properties of \$27.10, \$45 and \$117 per ton

The hanging wall of the Callente Gold Mining company's townsite claim was cut today, and they expect to crosseut the ledge within the next forty-eight hours. This is the claim in which Simon namberger of, Sait Lake and George C. Fetterman of De Lamar are interested, and will be a bigger boost for mining in this district than any other claim in this locality when opened up, as it is backed by abundant capital and ample experience.

Graves and Fuller, owners of the United States gold group on the Virgin river, passed through camp today, en route to their mines, with a big supply of pro-visions and mining utersiis.

Ilm Newall and Bert Franklin, who have been prospecting south of Callente for the past two mouths, came in today and showed The Tribune man some samples of gold-silver ore taken from four claims they have located and completed work on fifteen miles south of camp.

Dick Winters came up from Moapa to-day with some fine samples of free-gold ore and some fine specimens of zinc taken from two groups of mines he has located near the Colorado river, and leaves to-morrow for Sait Lake to have his samples assayed. He had some difficulty in get-ting out with his samples, as he was held up by three rustlers who tried to gather in his horse for their own purposes.

ing the footwall. This ore went \$58, per ton at grass roots, and samples will soon be sent to Salt Lake for assay.

A Manganese Discovery.

A Manganese Discovery.

Reports are coming in of manganese claims in St. Thomas mining district, Lincoln county, Nevada, says the Reno Gazette. They are at the foot of a range of basic cruptive misses, and forming one side of the Boulder canyon, below Rioville. They are largely in beds, which are quite extensive, and contain all the ores of managenese from rhedocressate to pyrolisite. The ore is claimed to gleid from is to 45 per cent metallic manganese, but as there are no railroads in that yicinity, it is doubtful whether these deposits will be exploited in the immediate future.

Boston Dull but Firm.

Special to The Tribuns.

BOSTON, Mass., Aug. 22—A dull but firm market is what we have had the greater part of the day, with few stocks for sale and sorce commission-house orders to buy just below the present level. The disposition among traders was rather a waiting one than a desire to bid up prices but during the last hour, under the good strength displayed in Amsignanted, the copper sinces were taken hold of and fractional gains were scered. The closing was strong. Hornblower & Wecke, brokers, 33 State street, Boston, and 19 Wall street, New York, furnish the following quotations:
